Comments

Submission Type:
Customer wishes to comment on the Planning Application.

Comments:
At the meeting of South Cowal Community Council on 12 March 2008 following representations from members of the public and residents adjacent to this proposed development the council RESOLVED to submit a formal objection to this proposal.

The grounds of objection are as follows: The proposed development will require the cutting down of an area of ancient woodland which provides a habitat to a number of wildlife species. As this is the only woodland in this vicinity it is suggested that this should be preserved to the betterment of the environment.

Further it is noted that the developer has a number of other sites in that locale which could be suitable for building, development on these would not involve the loss of this woodland.
